

Project Initiation and Planning Phase

Date	4 October 2026
Team ID	6ab2951f1266c775575a6b80
Project Title	Farm Management System
Maximum Marks	5 Marks

Project Problem (Proposed Solution) and Statement

The proposed project aims to develop a farm management system for agricultural activities such as crop planning, livestock management, inventory tracking, and sales. It helps farmers manage their daily operations efficiently, reduce manual work, and improve productivity and profitability.

Project Overview

Objective	To provide a digital solution for farmers to manage their farm activities, track resources, and get real-time information for better decision making and increased productivity.
Scope	The system will cover crop management, livestock tracking, inventory management, sales and reports. It will be web-based and accessible from multiple devices.

Problem Statement

Description	Farmers face difficulties in managing their crops, livestock, inventory and sales manually. This leads to loss of data, time, and reduces overall efficiency.
Impact	Results in poor planning, delayed actions, financial loss, and difficulty in tracking farm activities and resources.

Proposed Solution

Approach	Develop a web-based farm management system with user-friendly interface, allowing farmers to manage crops, livestock, inventory and sales in one platform.
Key Features	- Crop planning and monitoring - Livestock management - Inventory tracking - Sales and expense records - Real-time alerts & notifications - Reports and analytics

Resource Requirements

- To develop and deploy the farm management system, we will need suitable hardware, software, firmware, libraries and data as detailed below.

Resource Requirements

Resource Type	Description	Specification / Requirement
Hardware	Computer / Laptop	Intel i3 or above, 8GB RAM, 256GB SSD
Operating System	OS	Windows 10 / 11 or Linux (Ubuntu 20.04+)
Software	Development Tools	VS Code / Eclipse, MySQL Workbench, XAMPP
Firmware	Web Server	Apache / Nginx (via XAMPP)
Libraries	Frameworks / Libraries	PHP (Laravel) / Node.js (Express), Bootstrap
Development Environment	IDE	VS Code / Eclipse
Data	Sample Data	Farmers, crops, livestock, inventory, sales (sample dataset)
