Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Farmer, Admin, Government Portal).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Register Farmer, Update Crop Details, Generate Report).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Farmer Database, Crop Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
