

Demonstration of Proposed Features

Date	5 October 2026
Team ID	6ab2951f1266c775575a6b80
Project Name	Farm Management System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Pending)	Demonstrated (Yes / No)	Remarks
1	Crop Health Analysis Module	Leverages AI models to predict yield and detect disease from multi-spectral	Implemented	Yes	Core model achieved 94% accuracy.
2	Real-time IoT Sensor Dashboard	Integrates data from field-deployed soil and weather sensors into an intuitive web UI.	Implemented	Yes	Data streams from 10 sensor nodes.
3	Automated Irrigation Control	Develops a rule-based algorithm for intelligent watering based on sensor data.	Implemented	Yes	Tested with solenoid valve simulation.
4	Market Price Prediction API	Fetches and processes external market data to provide commodity price forecasts.	PostGIS	No	API integrated; prediction model still under development.
5	Drone Path Planning Utility	Creates optimal drone flight paths for field scanning, considering terrain and obstacles.	PostGIS	No	Algorithm complete; simulation testing pending.
6	User Role Management	Securely handles different access levels for Farmers, Admins, and Analysts.	Implemented	Yes	RBAC implemented via JWT.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	4
Total Features Demonstrated	4
Overall Implementation Rate (%)	66.6%
