

Solution Requirements

Date	4 October 2026
Team ID	6ab2951f1266c775575a6b80
Project Name	Farm Management System
Maximum Marks	5 Marks

Functional and Non-Functional Requirements

Collect the functional and non-functional requirements for the proposed solution. Specify what your solution will do and the quality it must have.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	User Registration & Login	- Provide secure registration for farmers, admin and staff. - Allow users to login with valid credentials.	High
2	Farm Management	- Add, edit and delete farm details. - Manage crop information and land records.	High
3	Crop Monitoring	- Track crop growth stages. - Record and view weather, soil and irrigation data.	Medium
4	Reports & Analytics	- Generate yield, expense and profit reports. - View graphical data and summaries.	Medium
5	Notifications & Alerts	- Send reminders for water, fertilizer and harvest. - Notify about diseases and weather changes.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	System should respond quickly even with multiple users.	Page load time < 2 seconds.
2	Scalability	Should support growth in users and more farms in future.	Supports up to 10,000 concurrent users.
3	Security & Data Privacy	Protect user data and prevent unauthorized access.	- End-to-end encryption. - AES-256 for sensitive data.
4	Reliability & Availability	System should be stable and available most of the time.	99.9% uptime per month.
5	Usability & Accessibility	Easy to use for all types of users (farmers, admin, staff).	Complies with WCAG 2.1 AA standards.
6	Maintainability	Code should be modular and well-documented.	Clear documentation and version control (Git).
